

Q&A DOCUMENT

Question: "Tell me about a time you had to learn a new technology quickly."

- **Situation:** In my final year project, we needed to use GitHub for version control, which I had only basic knowledge of.
- **Task:** I was responsible for managing the project's code repository and ensuring smooth collaboration between team members.
- **Action:** I dedicated a weekend to completing an online tutorial on GitHub basics and branches. I then created a simple guide for my teammates and set up the project repository with a clear branching strategy.
- **Result:** Our team was able to collaborate without any code conflicts, and the project was delivered successfully. I became the go-to person for Git-related questions in the team.
